Third-Gen Locking Tie-Down Straps

The launch of the third generation Lockstraps locking tie downs incorporate heat-sealed clamshell packaging that can be set on a shelf or hung from a hang tag. The third generation Lockstraps carabiners incorporate thicker steel and have been heat treated for even more superior strength. The strength of the sliding clasp and push button spring also have increased.

Sure Sellers:

- Won't pop off like typical tie down straps with "S" hooks
- Built with an eight-braided stainless steel cable embedded between double nylon straps
- Tough rivets keep dual combination carabineer locks in place at both ends of the Lockstraps

Retail Price: \$39.95-\$44.95 October 2011
